OCRA is the leading organization in the world fighting ovarian cancer from all fronts, including in the lab and on Capitol Hill, while supporting patients and their families.

**THE NEED**

Ovarian cancer is the 5th leading cause of cancer deaths in American women.

Ovarian cancer is the only 1 out of 10 grants that can typically be funded by OCRA and the number of applications continues to grow steadily.

One reason is that there is no early detection test, so most cases are diagnosed when the disease is advanced.

230,000 in the U.S. are currently living with ovarian cancer.

**OUR IMPACT**

We've funded $110 million in private research including 350 grants at nearly 75 leading medical institutions.

OCRA has been instrumental in securing over $3.4 billion in federal funding since 1998 for ovarian cancer awareness and research.

We touch more than 2,500 patients and their families every month, offering support and resources.

115,000 healthcare students have been educated about risk factors and symptoms from more than 5,000 survivors since 2002.
